The airport has four passenger terminals, Terminal 1, Terminal 2, Terminal 3 and Terminal 4. T1 is the new Terminal 1, built to international standards. T2 and T3 are the older Terminals 2 and 3, respectively. Terminal 1 (A1), (which opened in 2010) is the newest airport terminal in Europe. It is the first US\$200 million terminal to be built in Europe in over 20 years, and is the second largest passenger terminal in Europe after Heathrow Airport in London. With the opening of T1, the airport has regained its position as the leading international airport in the world. Terminal 2 (A2) is the largest of the three existing terminals and was opened in 1968. The average traffic at the terminal in 2008 was over 35 million passengers per year. With the opening of T1, the airport's parking capacity was increased from 3,500 cars to 10,000 cars. The parking facility has space for about 1,200 Mercedes-Benz, Lexus and BMW cars. It also has space for around 17,000 trailers. Terminal 3 (A3) opened in 1988. It has an average traffic of around 17 million passengers per year. Its capacity is about 2,000 passengers per hour, but this can be increased to over 3,000 passengers per hour, if necessary. Terminal 4 (A4) is a small terminal used mainly for charter flights, with an average traffic of 2 million passengers per year. General information The airport Madrid-Barajas is the largest airport in Spain. Terminals Terminals 1, 2 and 3 can handle up to 5 million passengers per year. T1 has a capacity of 4 million passengers per year and was opened in 2010. T3 has a capacity of 4 million passengers per year. T4 is the smaller of the three terminals and is used mainly for charter flights. The terminal has space for around 600 passengers per hour, but this can be increased to over 1,000 passengers per hour. Airlines and destinations Ground transportation Metro The airport is connected to the Madrid Metro Red (M-2) Line 1 at the Madrid Atocha railway station.
